

Title of the Official Side Event	Renewable energy scenarios as guidance for policy makers – practical examples from global to national levels
Side Event Theme / Description	<p>Scenarios are images of alternative futures indicating how the future could unfold. They are neither predictions nor forecasts but useful tools for policy makers for investigating alternative future developments and their implications.</p> <p>The proposed side event will showcase the practical use of scenarios on global (Energy[R] evolution scenario), regional (RE-thinking 2050) and national (Germany, Portugal) levels.</p>
Potential speakers and panelists	<p>Sven Teske, Greenpeace International Christine Lins, EREC Rainer Hinrichs- Rahlwes, BEE Antonio Sa Da Costa, APREN</p>
