

International Support for Clean Energy Development Plans

Sadie Cox, NREL
Delhi International Renewable
Energy Conference
October 27, 2010

*CLEAN Mission: To improve quality
and harmonize support to developing
countries for low GHG emissions
development plans*

+ Side Event Objectives

- To provide a general overview of CLEAN
- To present CLEAN partner activities that support clean energy low emissions development
- To discuss how CLEAN can further advance these and other activities to support clean energy low emissions development

+ Agenda

■ **Overview of CLEAN**

- Background, Objectives and Structure
- Activities and Inventory
- Outcomes from recent CLEAN expert meeting

■ **CLEAN partner activities supporting clean energy low emissions development planning**

- Overview of related projects, programs and tools
- Current efforts to share tools and best practices within CLEAN

■ **How can CLEAN improve collaboration on low emission development activities?**

- Sharing tools and best practices, e-learning and training programs, technical assistance within a country

+ Presenters

- BinuParthan, Deputy Director General , Renewable Energy and Energy Efficiency Partnership (REEEP)
- HolgerLiptow, Deputy Head Energy and Transport, GTZ
- Shannon Cowlin, Senior Project Leader, US National Renewable Energy Laboratory (NREL)
- Pradeep Kumar Dadhich, Senior Fellow, The Energy Resources Institute (TERI)
- Sadie Cox, International Analyst and Lead for CLEAN Secretariat, US NREL

+ CLEAN Rationale

- Growing number activities in this space
- Need to share information and resources
- Opportunity to strengthen quality and reduce duplication of effort and cost of support

+ CLEAN Objectives

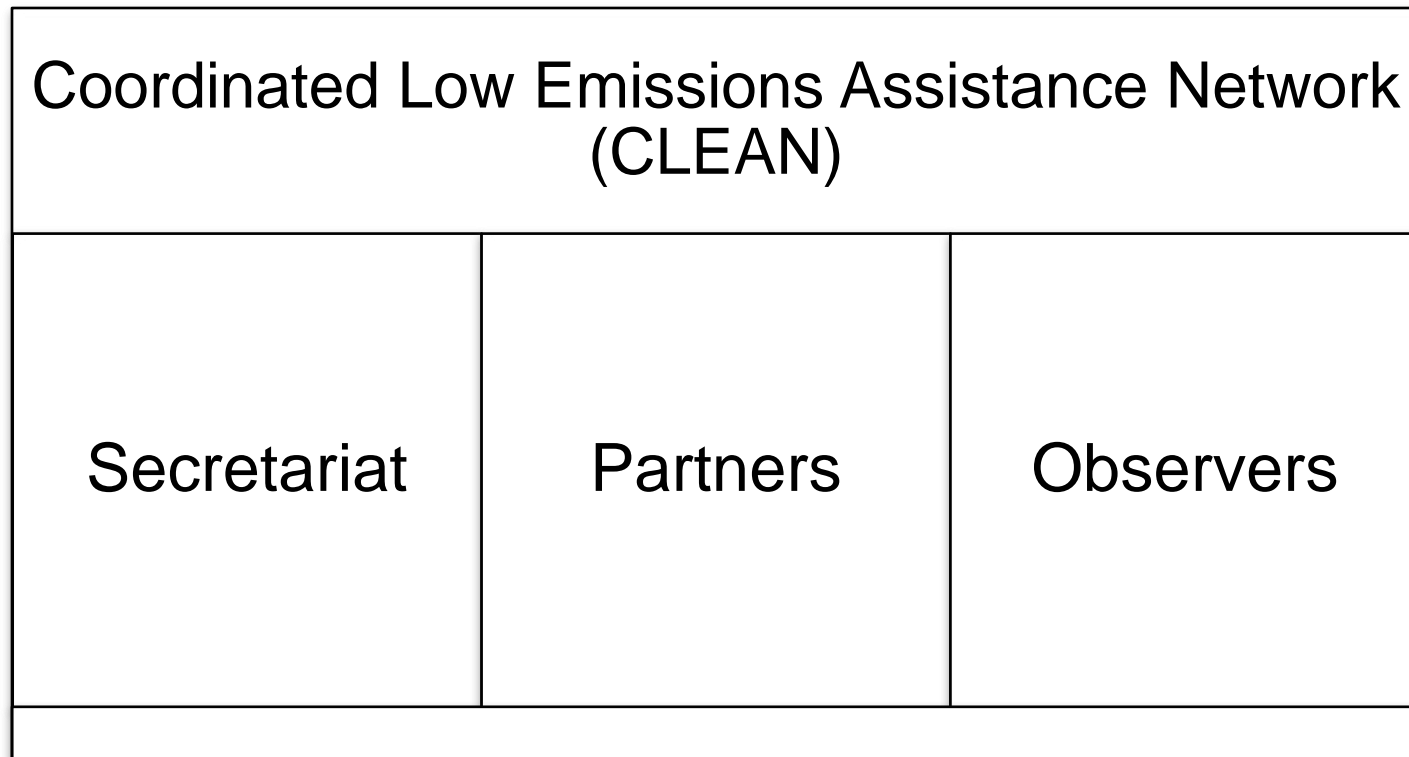

**Foster
Collaboration**

**Improve
Quality**

**Build
Capacity**

**Share
Information**

+ Organizational Structure

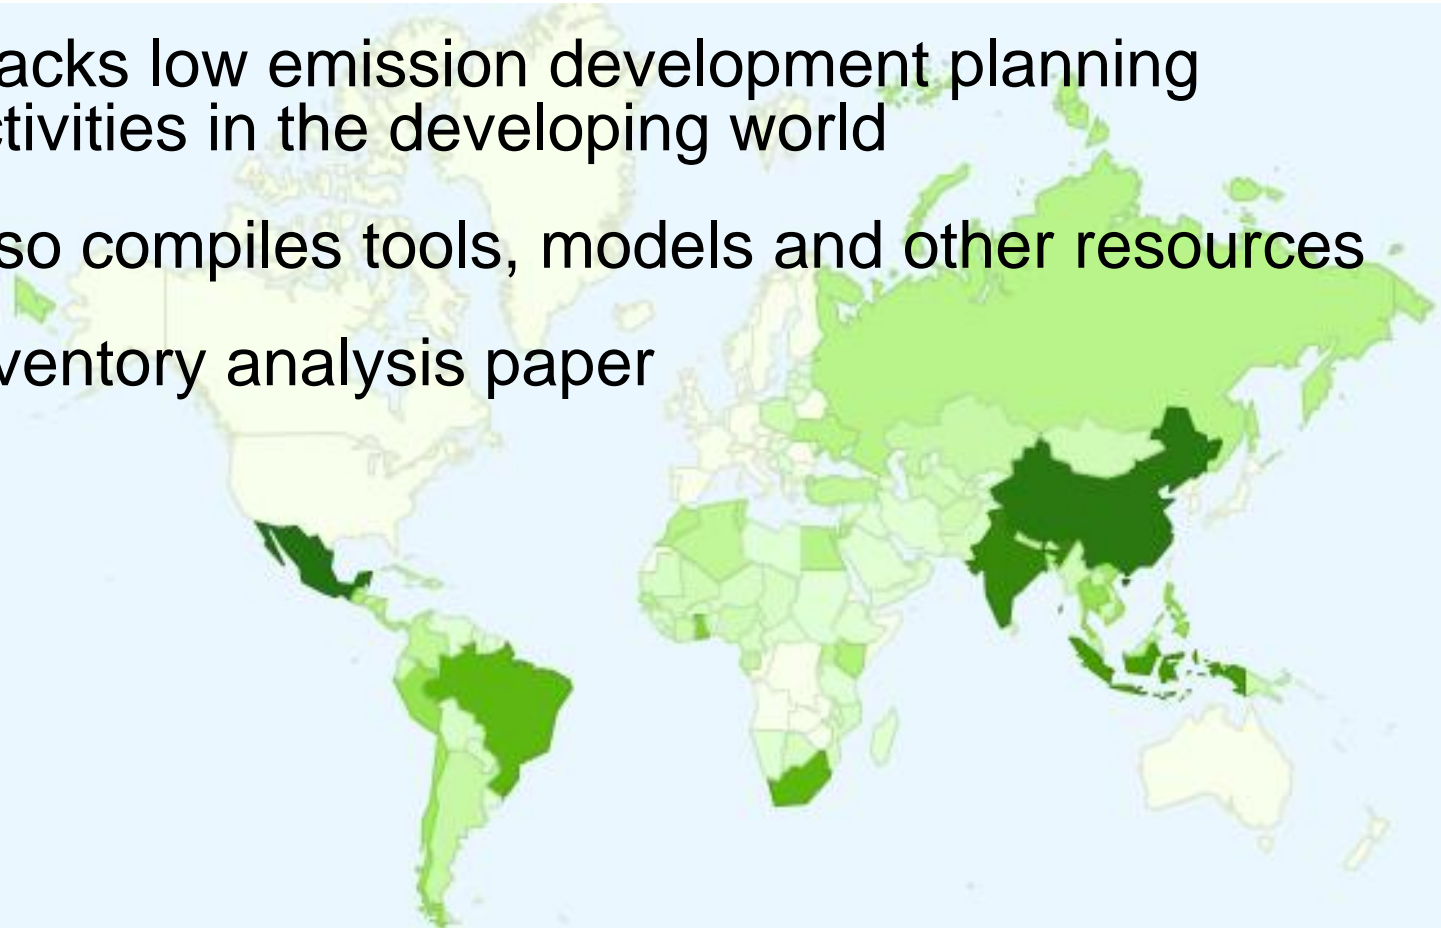

+ Foundational Activities

- Establish and Apply Shared Principles
- Construct and Maintain an Inventory
- Share Methods and Tools
- Link to Other International Groups

+ CLEAN Inventory: openei.org/CLEAN

- Tracks low emission development planning activities in the developing world
- Also compiles tools, models and other resources
- Inventory analysis paper

+ Outcomes from the CLEAN expert meeting and next steps for collaboration

- Continued expert review of partner methods and frameworks
- Collaborative projects
 - User guide and comparative review of methodologies and tools
 - Exploration of links between NAMAs, TNAs, LEDS, roadmaps
 - Framework for presenting economic/development case
 - Harmonized training programs
 - Integrated technology data bases
- Upcoming CLEAN webinars and outreach events

+ Key Question

- How can CLEAN improve collaboration on low emission development activities?
 - Sharing tools and best practices
 - E-learning and training programs
 - Technical assistance within a country
