

Mr. Daniel Magallon

Managing Director, Basel Agency for Sustainable Energy

Daniel Magallon has ample knowledge of renewable energy and energy efficiency. He holds a BSc. in Civil Engineering, an MBA from ITESM, Monterrey, Mexico, and a MSc in renewable energy managed by the European Renewable Energy Centre EUREC in cooperation with the University of Zaragoza in Spain and the University of Kassel in Germany. He is currently working on financing mechanisms and risk mitigation instruments, including debt and equity finance of projects, third party financing models, as well as insurance products. His extensive experience includes the coordination of numerous construction projects, accounting, financial analysis and fundraising.

Daniel is part of the coordination team involved in the research activities under UNEP/GEF/IDA/Worldbank Assessment of Financial Risk Management FRM (Instruments for Renewable Energy Projects in developing countries), and he has participated in various international seminars on sustainable energy. At the moment he is developing a SEFI strategy to engage financial institutions in financing sustainable energy projects in Latin America countries and Africa.
